

ENVELOP DESK

THE FIRST DESK DESIGNED WITH TASK CHAIRS IN MIND

Because the Envelop desk moves and encourages movement, it lets people take full advantage of the support offered by their synchronous-tilt task chairs. Simply and easily, Envelop, part of The Be Collection,[™] makes people more comfortable with their chairs, their work, and their technology.

Like no other desk, Envelop helps people maintain consistent visual distance and optimal alignment with their computer screens. It allows them to synchronously move laptops or keyboards, pointing devices, and computer screens nearer or farther away depending on their own changing positions and preferences.

With its trim, refined design, Envelop has an aesthetic character that lets it stand handsomely on its own or blend in harmoniously with a larger environment. Wherever it's used, Envelop fits right in.

Adaptable in both look and function, Envelop helps people perform in a variety of corporate, educational, or healthcare settings and within traditional, contemporary, open, or private applications.

Herman Miller Envelop® Desk

Envelop desk with polished aluminum legs

Laminate top with clear plywood edges

Veneer top with stained plywood edges

Comfortable control

Subtle indentations on each side of the “infield” surface make it easy and comfortable for the user to move Envelop’s surface closer or farther away.

Cord management

A compartment under the “outfield” portion of the work surface provides handy storage and management of cables, outlets, and transformers.

Height-adjustable legs

The surface of the Envelop desk is vertically adjustable within a 5-inch range.

Materials

The Envelop desk offers a versatile materials selection of finish colors, laminates, and veneers designed to be used together as well as to coordinate with its surroundings. The “infield” portion of the surface is only available in BK Black.

Finish									
									
Solid Laminate									
Patterned Laminate
